Catch-up growth, fetal biparietal diameter, intrauterine development, 121
Cefalotin tissue concentrations, 29
Cefazolin and **cefalotin** tissue concentrations, endometrium, tube, 29
Cekan, Z., 209
Cervical cancer, incidence rates, 265
Cervical mucus, contraception, 'ovulation method', 63
Challis, J.R.G., 191
Clamping of the umbilical cord, placenta, quantitative morphology, stereology, 325
Clear-cell carcinoma, Müllerian neoplasm, multiple tumors, 301
Coltart, T.M., Aubrey, C., Thomas, R.L. and Hipkin, M., A comparative trial of suprapubic versus urethral catheter following vaginal surgery, 77
Congenital anomalies, acceleration, fetal tachogram, intrauterine pressure, short-term variability, 249
Contraception, cervical mucus, 'ovulation method', 63
Corpus luteum
early pregnancy, human, progesterone formation, synthetic gestagens, 223
luteal phase, sheep, tonic inhibition, 191
Corpus luteum function
clinical aspects, 165
decidualization, 169
effects of 17α-ethinyl-19-nortestosterone, 219
experimental aspects, 157
human, 145
hysterectomy, 169
LH concentrations, 169
preovulatory determinants, 145
rat, 169
Corticoid medication, placental lactogen (HPL), pregnancy-specific protein (SP-1), single radial immunodiffusion, 59
Creatinine clearance, fetal urine production, glomerular filtration rate of plasma, percentage tubular reabsorption of water, 103
Cyclic AMP levels, follicle-stimulating hormone, young corpora lutea, rat, 175
Cushing's syndrome, ACTH, pigmentation, pregnancy, 67
Czygan, P.-J., 219

Donovan, B.T., Experimental aspects of corpus luteum function, 157
Drogendijk, A.C., 103
Dullaart, J., 169
Dynamics of fetal breathing movements, M-mode recording, multiscan echofetography, real-time cross-section, 339

Early pregnancy
corpus luteum, human, progesterone formation, synthetic gestagens, 223
LH-HCG RIA, 239
Endometrial cancer, incidence rates, 265
Endometrium
cefazolin and cefalotin tissue concentrations, tube, 29
inhibition of ovulation, 315
Energy requirements, lactate, polar body degeneration, 35
Epidemiology, chance of getting uterine cancer, female population, 265
Ezcurra, P., 17

Farman, D.J., 271, 339
Fasting, glucose, increment index, plasma, 235
Ferreira Vicente, L., 7
Fetal biparietal diameter
catch-up growth, intrauterine development, 121
fetal sex, parity, 23
Fetal breathing movements, M-mode recording, multiscan echofetography, real-time cross-section, 271
Fetal compartment, amino acids, fetal urine, liquor amnii, maternal compartment, proteins, 295
Fetal growth, biparietal diameter, ultrasonography, 257
Fetal heart rate patterns, hydrocephaly, intracranial pressure, 249
Fetal scalp thickness, diabetic pregnancy, 71
Fetal tachogram, acceleration, congenital anomalies, intrauterine pressure, short-term variability, 249
Fetal urine, amino acids, fetal compartment, liquor amnii, maternal compartment, proteins, 295
Fetal urine production, creatinine clearance, glomerular filtration rate of plasma, percentage tubular reabsorption of water, 103
Fetography, amniography, diabetes mellitus, fetus, scalp thickness, 71
Feto-maternal hemorrhage, perinatal mortality, posthemorrhagic anemia, 125
Fetus, amniography, diabetes mellitus, fetography, scalp thickness, 71
Follicle-stimulating hormone, cyclic AMP levels, young corpora lutea, rat, 175
Fuchs, F., 93
Furr, B.J.A., 191

Galimidi, S., 109, 115
Glomerular filtration rate of plasma, creatinine clearance, fetal urine production, percentage tubular reabsorption of water, 103
Glucose, fasting, increment index, plasma, 235
Glucose tolerance, pleeclampsia, 235
Gonadotropic hormone, active protein, placenta, uterotropic hormone, 109
Gonadotropins, placenta, 115
